UNIBODY SERIES

KS-1 Stage Vocal Condensor Mic

Vocal condensers for stage use have recently become popular offered in two series: with true condenser capsules (costly) or pre-polarized electret capsules (cheap). Until now, we have never found the correct combination of gain, noise floor, frequency response and handling that we liked. Now, delivering classic looks and great audio at an affordable price, this true-condenser sets the performance standard.

Using our fastest electronics, a new 15mm capsule, sturdy internal shockmounting and front and rear phase correction - we threw everything into this stage vocal mic. Our classic body style with THE accents has gain and clarity for miles. A knockout!

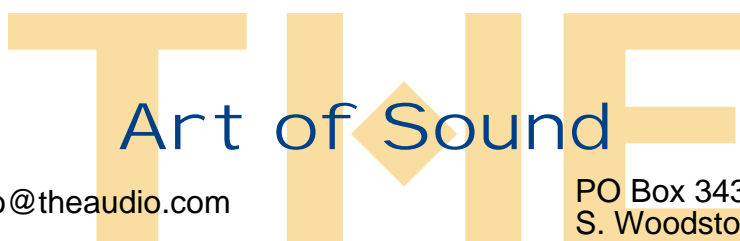

Technical Specifications:

Directional pattern: cardioid,
Principal of operation: pressure gradient
Sensitivity: 12 mV/Pa
Frequency response range: 45 Hz - 19,000 Hz
Equivalent SPL rated
At CCIR 468-3: 26 dB-A
At DIN/IEC 651: 16 db-A

SIN ratio rated at DIN/IEC at 1 pa: 78 dB-A
Max SPL for 0.5% THD: 132 dB

Diameter of capsule: 15.4 mm
Preamp body required: mic is self-contained (unibody)
Phantom Power: 48 Vdc

Weight: 380 gr.
Length: 185 mm
